

MECHANICAL SERVICES

1. Balance of Plant (BOP) erection and demolition projects
2. Material transfer equipment erection, demolition and repair
3. Structural steel erection, demolition and repair
4. Specialized rigging projects
5. Pump setting and removal
6. Cooling tower erection, demolition and repair
7. Specialty welding on any alloy material
8. Specialty cleaning and hydrostatic testing services

At ME&I, we deliver industry-leading mechanical services, with capabilities second to none. Our experienced field teams are fully qualified to carry out all erection or repair work,

and our highly skilled field engineering and design engineering teams ensure successful project delivery.

ME&I delivers erection and repair services to all parts of a facility that involves material transfer; from fuel transfer equipment (solid, liquid or gas), to the by-products of combustion and flue gas cleaning.

Structural steel systems can be engineered and erected to fit any facility requirements. We have the ability to design pumps and pipeline systems for any application on any type of fluid.

Cooling tower systems can be completely designed, repaired and erected to fit all requirements; from natural draft, parabolic towers to mechanical draft, cell-type towers - ME&I ensures the cooling tower project is designed and executed with the highest attention to detail and quality workmanship.

With our resources being provided by one of the best names in the mechanical services industry, ME&I holds a distinct advantage entering the market. EnerMech is a global leader in pipeline projects and boasts a heritage of over 40 years. Our relationship with EnerMech positions us to carry out specialty cleaning as required (chemical, hydro-blasting, grit-blasting, pigging, etc).

Safety is engrained in our culture, and is integral to every aspect of our business. We drive an incident-free workplace, engaging with our workforce to ensure they feel competent at identifying accident hazards, while also feeling empowered to speak up if they identify an unsafe act. While we protect our people, we are also acutely aware of our responsibility to protect our communities and the environment in which we work. ME&I is a target zero company. Our employees and contractors must sign our Commitment to Safety documents before performing any work for the company. Using industrial safety standards such as Safety Conscious Work Environment (SCWE), Behavior Differentiation (BD), and Human Performance (HuP), we hold our employees and contractors to some of the strongest safety programs in the industry. Our goal is to ensure that we pick up on any leading indicators and take corrective and preventative action.
